

## Sun Song Rising

1. Sun song rising in the sky,  
lifting light of newborn life.  
Splendid wonder of Easter shining again!  
Long abiding hope now dances with the glory of this day.
2. Seasons change while dreams we weave  
through the slumber of the night,  
telling stories of places long forgotten:  
image of the past shall fade as healing love arises within.
3. Day has come, the sun now climbs  
out of darkness to its height.  
Feel within you now the lifting of your life  
beyond death and pain:  
be clothed in light; let the joy run freely again.
4. Sun song rising in the sky,  
lifting light of newborn life.  
Splendid wonder of Easter shining again!  
Long abiding hope now dances with the glory of this day.
